

A new insight into the northern filaments of Centaurus A (Salomé Q. et al. 2016)

Evidence of AGN **positive feedback** observed in a few radio galaxies: the **interaction** of the radio jet with the IGM may **enhance star formation** (Salomé Q. et al. 2015)

Positions	East	West
M_{HI}	2.4×10^6	1.9×10^7
M_{H_2}	5.1×10^7	2.6×10^7
$M_{\text{H}_2}/M_{\text{HI}}$	~ 21.3	~ 1.37
